

Environmental Information Assessment

Purpose: The Environmental Information Assessment is intended to identify any potential environmental effects of a proposed development project and to facilitate the completion of a subsequent Initial Study. The Initial Study document is the primary means of determining the level of environmental review required under the California Environmental Quality Act (CEQA) and, consequently, whether a Negative Declaration or an Environmental Impact Report must be completed for a proposed project.

Submittal Requirements: Most environmental impact assessments are required in conjunction with a request for a land use or site plan approval. In such cases, see the information sheet for a project for all submittal requirements. This information sheet & questionnaire provides supplemental information to the project submittal.

Project Address: _____

Assessor's Parcel Number: _____

General Plan Designation: _____ **Zoning District:** _____

Project Applicant: _____

Project Description (Proposed land use and/or business, development type and size, hours of operation, and onsite parking):

Existing Site Setting (Describe topography, soils, vegetation, available utilities, existing buildings/structures, existing use): _____

Existing Surrounding Site Setting (Describe topography, vegetation, available utilities, existing buildings/structures, existing uses): _____

ENVIRONMENTAL INFORMATION QUESTIONNAIRE:

The applicant shall complete all questions in regard to their project and site (use additional paper if necessary) and submit with the proposed project application.

1. Aesthetics.

Briefly describe the overall development pattern, structure types, daytime glare, night lighting, and proposed landscape treatment.

2. Plants & Animal Habitat.

Yes No Unknown

- Does the site contain any endangered animal or plant species habitat?
- Does the site contain any important wildlife breeding, nesting, or feeding area?
- Does the project traverse or alter any drainage swale or creek?
- Does the site contain any mature trees (4" or more in diameter)?
- Does the project require native tree removal or work within 20' of native tree driplines?

3. Soils and Topography.

Provide topographic map, if applicable, showing portions of site with a slope of 15 percent or less, between 15 and 30 percent and greater than 30 percent. Briefly describe any grading or topographic changes required of the project. Identify cubic yards of cut & fill.

4. Potential Historical Resources.

Yes No Unknown

- Does the property contain buildings or structures over 50 years old?
- Estimated age of existing structures, include description:

5. Geologic Hazards.

Yes No Unknown

- Does the site contain any evidence of past land slides, unstable soils or serpentine rock?

6. Community Safety.

Note any special requirements for fire or police services such as hazardous materials use or storage. _____

7. Water Resources.

Describe the method(s) to be used to manage storm water. Identify Best Management Practices (BMP's) that will be used to prevent pollutants from entering the storm water system after the project is completed.

8. Noise and Vibration.

Will the project produce a noticeable change in the ambient noise levels or subject persons to excessive noise levels or vibrations? If so, what would cause the change?

9. Residential Development.

Describe the proposed housing mix (unit types and prices/rents) of this project. Identify the number of affordable units proposed.

10. Solid & Liquid Wastes.

Is sewer available to the project?

Yes	No
<input type="checkbox"/>	<input type="checkbox"/>

Are facilities for trash/recycle storage adequate to accommodate onsite uses?

<input type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------

11. Solid & Liquid Wastes.

Estimate the number of auto and truck trips generated daily by this project. Indicate trip generation factor and source of traffic.
